James Walker		Date:	Rev:	Page:	Document No: QPD36 A
	Cured Extruded Products	Feb 17, 2020 Reaffirmed 2023	1	Page 1 of 2	Approved by: Extrusion Manager

**REASON FOR UPDATE:** Document Review

ASSOCIATED DOCUMENTS: FMP Ref: FMP 12 OPI Ref: OPI 21, OPI 63

## 1. PURPOSE

**1.1** To provide a procedure for cured extruded products aka finish extrusion

## 2. SCOPE

**2.1** This document applies to all those involved with cured extruded products.

## 3. **RESPONSIBILITY**

3.1 The Extrusion Manager is responsible for updating and communicating the details within this procedure.

## 4. PROCEDURE

Stage	Action Points				
Material Check	1. Is the material in specification and shelf life?				
Initial Sample Quality Check	<ol> <li>Check the temperature profile provided on the paperwork or use OPI63 for correct temperature profile of the rubber.</li> <li>At start of the process do the initial dimensional check to ensure that the die is correct and provides the correct extrudate sizes.</li> <li>Use of JW Standards 200.001, 200.022 or 200.112 as relevant.</li> <li>Damaged Die to be reported to Extrusion Manager/ Team leader for evaluation and repair.</li> </ol>				
Production	Ensure safe feeding of rubber strips into extruder – do not use metal tools to assist.				
Continuous Quality Check	<ol> <li>Continuous dimensional and visual check should be carried out by extruder operator.</li> <li>No material to be autoclaved before dimensional and visual check.</li> <li>Any doubts to be referred to Quality department.</li> <li>Damaged Die to be reported to Extrusion Manager/ Team leader for evaluation and repair.</li> <li>Stamp the Discrete Job after completing the extrusion process and checking the extrudate.</li> </ol>				
Autoclave Operation	<ul><li>12. See OPI 21 for curing of rubber extrusion using an Autoclave or oven.</li><li>13. Fill in the autoclave book with the detail to ensure traceability.</li></ul>

		<ol> <li>Labels/discrete job to be stamped confirming autoclaving completed by the operator.</li> </ol>				
Post-Autoclave		<ul><li>15. Complete any additional operations e.g. clean, post cure, etc.</li><li>16. Discrete job to be stamped confirming post cure process.</li></ul>				
Final Quality Check		<ul> <li>17. Dimensional and visual inspection to be done and recorded on the relevant sheet by the extruder operator.</li> <li>18. Use of relevant JW Inspection Standards 200 series.</li> <li>19. Inspection record sheet to be stamped by extruder operator.</li> <li>20. Damaged Die to be reported to Extrusion manager/ Team leader for evaluation and repair.</li> </ul>				
Label as per Requirements		<ul><li>21. Book the job out.</li><li>22. Print required number of labels.</li><li>23. Attach the oracle label to the goods.</li><li>24. Check batch number is printed on the label, if not, hand writes them on.</li></ul>				
Delivery		25. Place finished goods at correct location for collection as per the requirement.
